

Zen Sheep and Beef Farm

Zen Sheep and Beef Farm is a family owned and operated USDA NOP organic livestock farm that raises organic lamb, beef and sheep and produces organic wool products. We have been certified organic for over 14 years and have been farming organically since 1984. We also raise and sell organic vegetables including organic garlic, which is one of our specialties. Our farm practices sustainable organic agricultural methods with approximately 20 tons of certified organic compost produced every year for our fields and gardens. Our organic lambs and beef are all pasture raised and supplemented with certified organic grains and hay. All feed is formulated and mixed right on the farm, and all organic hay is raised on our own fields. With most lamb products coming from outside the country, we have a truly small carbon footprint for our farm products which come all the way from Putnam Co., IN! Our wool products include yarn, rovings and battings all made from organic wool. We sell our lamb and beef products in many different health food stores throughout most of Indiana. Additionally the farm sells individual cuts of lamb and beef as well as whole and half lambs with custom processing and cutting and free local delivery. See our web site for more information: www.ZenSheepFarm.com, email: zensheepfarm@zensheepfarm.com
